

Infectious Diseases
Point of Care Tests & Enzyme Immuno Assay

Biocard™ lateral flow tests

- Principle used is rapid immunochromatography
- Processing time of 10 minutes
- Results can be obtained during the doctor's appointment
- No instrumentation is needed: all the accessories for sampling and running the test are included
- No venipuncture and serum separation is needed as tests can be done directly from the fingertip blood

Key Features

Sensitivity	100 %
Specificity	> 88 %
Transportation and Storage	4° C

Ordering Information

Product Code	Description	Pack Size (Tests)
3-034-000	Biocard™ Chlamydia pneumoniae IgM	10
3-035-000	Biocard™ Mycoplasma pneumoniae IgM	20

EIA tests (Enzyme Immuno Assay)

- EIA tests have similar test procedures, interchangeable buffers and substrates
- IgG absorbent included in ready-to use reagents in IgM kit
- Flexibility to use in different automated and manual systems
- Individually coded removable strips for convenience in test combination
- Preferred method by well-established clinical and research laboratories
- Ready-to-use components

Key Features

Sensitivity	96 %
Specificity	95 %
Transportation and Storage	4° C

Ordering Information

Product Code	Description	Pack Size (Tests)
6111300	Chlamydia pneumoniae IgG EIA	96
6111310	Chlamydia pneumoniae IgA EIA	96
6111320	Chlamydia pneumoniae IgM EIA	96
6111400	Mycoplasma pneumoniae IgG EIA	96
6111410	Mycoplasma pneumoniae IgA EIA	96
6111420	Mycoplasma pneumoniae IgM EIA	96
6111101	Chlamydia Trachomatis IgG EIA	96
6111111	Chlamydia Trachomatis IgA EIA	96
