

A World of HEALING, HOPE & HUMANITY

MAKING MILLIONS SMILE... THROUGH THE LANGUAGE OF CARE

Idyllic environs, lush meadows, swaying paddy fields and merry children... it seemed like the perfect beautiful countryside, but only until Sophia's tryst with troubles began. Her only child, Sam, hadn't been keeping well for the past few days. He had been suffering from repeated episodes of fever and the treatment he was receiving at the dilapidated dispensary in the community wasn't proving to be effective. With no other options in the absence of modern healthcare facilities, Sophia had to take her son to the nearest city for proper treatment.

This is the story of not one Sophia but many Sophias in the remote corners of the world. Access to a complete set of healthcare facilities including diagnostics and therapeutics would have remained a distant dream for people inhabiting those remote terrains, had Trivitron not taken up the responsibility of transforming their lives through its technically superior, innovative products. It's because of Trivitron's efforts that people like Sophia needn't travel to cities anymore to seek quality healthcare as medical facilities such as In-Vitro Diagnostics, Imaging & Radiology, Newborn care, Radiation Protection, Critical Care and Operating Room Solutions are available at the healthcare centres near them.

Trivitron has made access to affordable and quality healthcare, a reality. And this is just the beginning. Beginning of a quest to reach people in every corner of the world, to reach every human who deserves the right to high quality care.

CARING FOR THE HUMANS OF TODAY & TOMORROW...

We have our origins in the beautiful land of India, a country known for its hospitality. We started our humble journey in this land and branched out across the globe to reach as far as the Africa and America in a very short span. Ever since we started our journey in 1997, we have been providing hospitals, physicians and above all, people - an enhanced healthcare experience. Through the language of care and comfort.

It's perfect to say we are on a global mission with a local heart.

Through our innovation and ground-breaking technologies, we have brought about a great transformation in the lives of people. Our mission is to take technology to the grassroots level, where no one has ventured before. Through our collective efforts and teamwork, we have overcome every obstacle in our path and made every challenge into a change that benefits the common man.

Our global brands - Kiran, Labsystems, Trivitron Healthcare Middle East, Trivitron Healthcare Africa and Trivitron Bome, made it possible for us to permeate through every corner of the world and offer healing and hope to those who need. Serving people of today, tomorrow and generations to come.

SEEING IS BELIEVING IMAGING & RADIOLOGY

Trivitron's expertise and experience in offering sophisticated Imaging Solutions and Radiology products is truly unmatched. We provide peerless products in the areas of CT, MRI, X-Ray, C-Arm, Digital Radiography, Ultrasound, Digital Mammography, Contrast Media, Radiation Protection and more. Our products are recognized and recommended by eminent medical professionals and reputed healthcare institutions.

PRECISION MATTERS

IN-VITRO DIAGNOSTICS

The most routinely conducted diagnosis to detect illnesses is In-Vitro or Lab Diagnostics. Precision plays a very vital role in Lab Diagnostics and we make sure to leave no stone unturned to offer the most reliable and precise results.

With in-house manufacturing facilities in India, Finland and Turkey, we have the capability to manufacture cutting-edge equipment and products that benefits patients and delivers value to healthcare facilities all over the world.

! Cytology ! Histopathology ! Microbiology ! Molecular Diagnostics

SAVING OUR FUTURE NEWBORN SCREENING

Little Sara looked like any other newborn. Happy, healthy, sleepy and full of smiles, as any other baby would do. But one little blood test at birth revealed she had 90% chances of developing a serious medical condition later in life. All hope was not lost as it was detected at birth. She was cured with medical intervention. Newborn Screening changed her life, forever. Stories like Sara's, of hope and happiness inspire us every day. They make our work more meaningful.

One little prick could save a baby's life. Yes, one simple blood screening test could detect potentially grave illnesses at birth. Newborn Screening changes lives.

Newborn Screening help us to detect several genetic disorders and life-threatening medical conditions at birth. The rarest of the rare disorders and genetic abnormalities can be found at birth. Early detection means early treatment which can help save babies and help them grow into healthy adults. At Trivitron, through our in-house R&D and our subsidiary, Labsystems - the Finnish Pioneer in Newborn Screening, we offer products and solutions that redefine Neonatal Care. Being the world number two in the Newborn Screening segment, it's our constant endeavour to bring the best to our customers.

PROTECTING THE SAVIOURS

RADIATION PROTECTION & ACCESSORIES

Dr. Ravi had been to that room many times before. But that day, everything looked new. This time, he was there as a patient and not as a Radiologist administering radiation to a patient. All due to one big mistake, not using adequate radiation protection to safeguard him.

Radiations and their increasing use in diagnostic field has raised serious concerns on the safety of patients and the medical staff administering radiation. Thanks to growing awareness initiatives by several healthcare centres and hospitals, radiation protection accessories have gained a prominence in the diagnostics world and their use is advocated by all healthcare providers.

Kiran, a radiology division of Trivitron is one of the top global brands and a world leader in manufacturing Radiation Protection Apparels and Accessories. We have spent more than three decades making human life safer, healthier and brighter; manufacturing an array of Radiation Protection products like Aprons, Vests, Shields, Disposable Lead-Free Gloves etc. Professionals across the globe trust the brand 'Kiran' for outstanding quality products and unparalleled service standards.

THE HEART OF CARE

CRITICAL CARE & ICU

Where every second is crucial. And every minute is monitored.

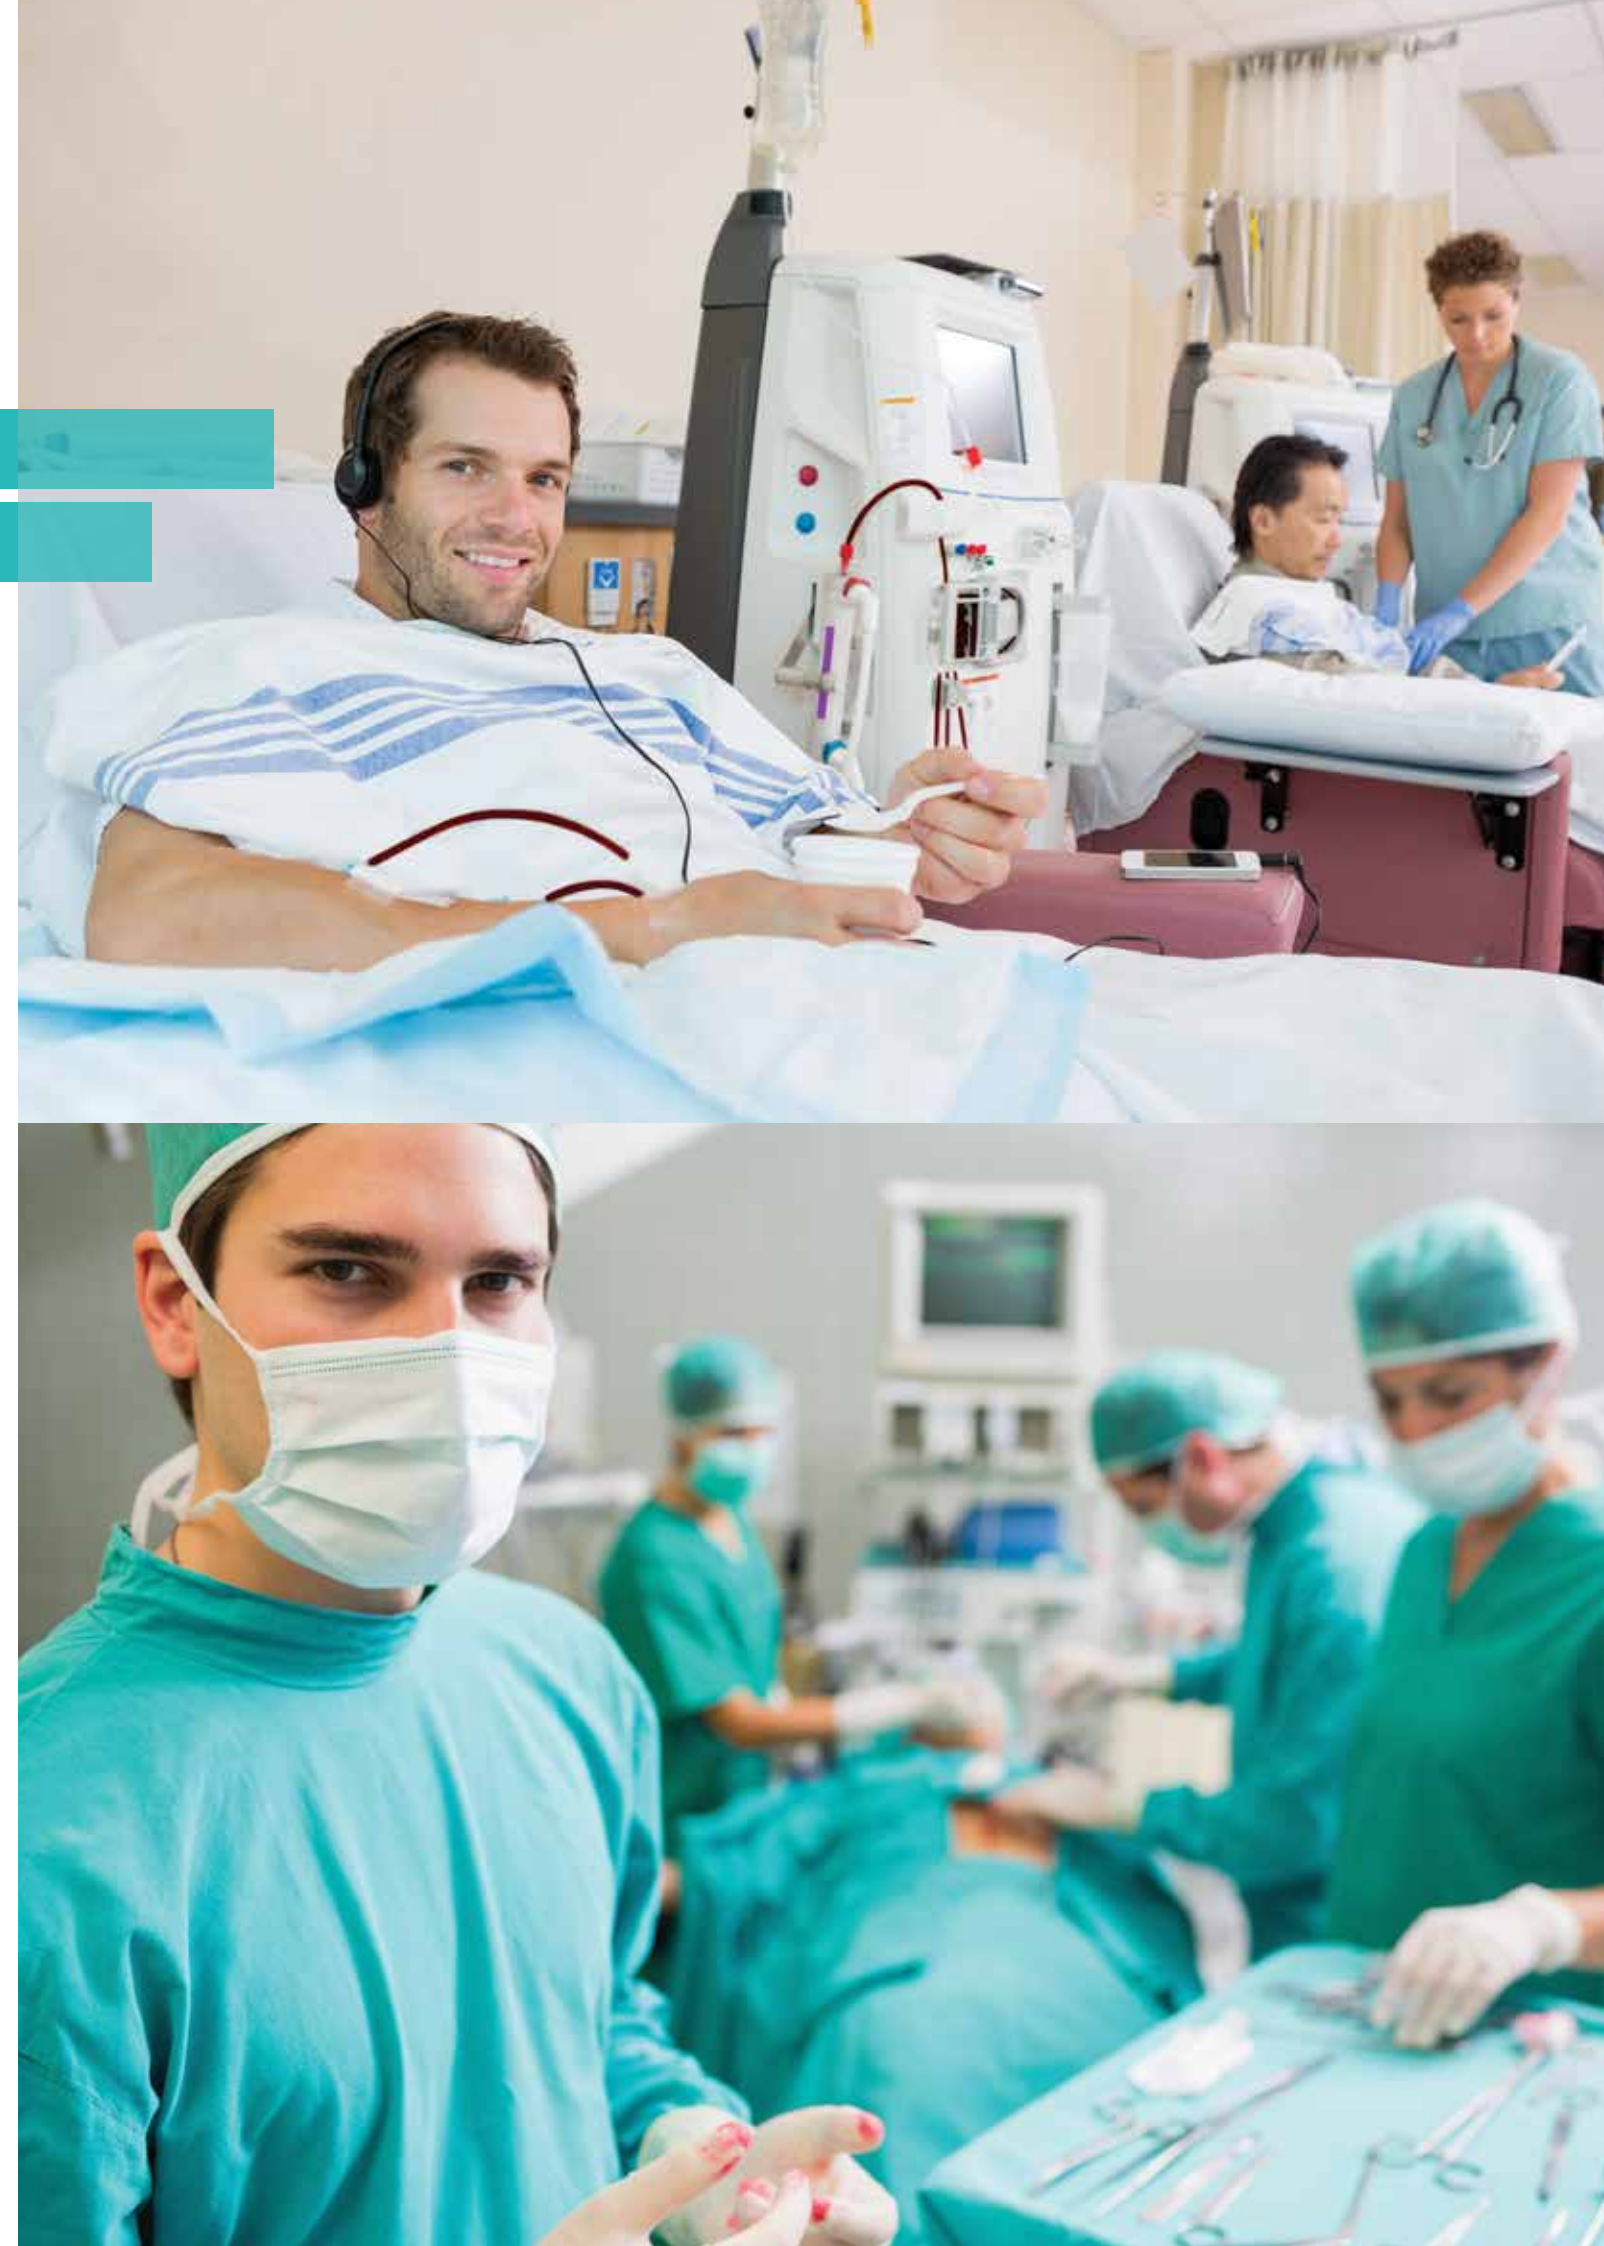

Equipment used in the Critical Care & ICU of the hospitals should operate with the highest degree of efficiency. At Triviron, we pride ourselves in manufacturing world class Critical Care equipment like ECG, Monitors, Ventilators and Advanced Life Support System.

Operation Theatre

As with the Critical Care, time is of the essence in an Operation Theatre. Quick, precise decisions are taken and life-saving procedures are performed here. Triviron offers best-in-class OR Solutions seamlessly blend optimum performance and futuristic technology to achieve desired results. Our OR solutions can be customized to the needs of the physicians, surgeons, anesthesiologists and nurses.

Renal Care

Triviron has etched a place for itself as a maker of effective and easy-to-use Dialysis machines. We offer a comprehensive range of Dialysis machines that ensure ease of use, patient comfort and safety at every level.

MAKING EXTRAORDINARY HAPPEN

While the focus has always been on better outcomes and improving the quality of life, it's now time to focus on affordable healthcare. We believe every innovation or technology makes real sense when it reaches every corner of the world.

We place strong emphasis on delivering products that surpass all standards and give every patient the care they rightfully deserve. All our products have lowest lifecycle cost and we ensure fastest response time to our customers. With our extraordinary customer support & delivery team, we are just a call away for our customers. With our dedicated on ground team, we are serving 2 customers every minute. We are proud to have a customer retention rate of 85% and a satisfaction index of 97% that speaks for our commitment and responsibility.

Our work is centred around patient care. We look forward every day, every challenge as an opportunity to create limitless possibilities and solutions that alleviate pain, improve care and enhance the quality of life for patients.
